ONLY 58 DB NOISE LEVEL

The Oil-Free Dual Piston Pump System is engineered for longevity, high performance, and durability.

The SP-9421 Motor/Pump is tested for a minimum pump life of 3000 hours before service. 30% more life before repair.

The SP Series of Ultra Quiet Air Compressor Motors have been designed to increase duty cycle and allow for longer continuous run times. *

Large 10.0-gallon steel air tank.

This air compressor is ideal for anyone working inside (office, shop, store, warehouse, or home) where noise is a major issue.

80% AIR DRYER SYSTEM

The 80% Air Dryer is specially designed to remove water vapor from the air to protect sensitive tools and machinery.

To dry the air from the air compressor an Aftercooler and 80% Air Dryer are utilized.

The aftercooler is a heat exchanger for cooling the discharge air from the air compressor. The water vapor from the compressed air is condensed into liquid form and pushed into the Air Dryer.
